FOR YOUR INFORMATION

Important Message

Please note that effective April 30, 2026, the trustee for all registered plan accounts (RRSP, RRIF, TFSA, FHSA, RESP, etc.) will change to TSX Trust Company. New declarations of trust will be available through our public websites.

Webull Securities (Canada) Limited ("WEBULL", "we," or "us") has an introducing broker carrying broker agreement with CI Investment Services Inc. ("CIIS"). CIIS provides WEBULL with custody, trading, clearing, and settlement services. WEBULL is solely responsible for determining or supervising the suitability of all trading activity. CIIS is a wholly-owned subsidiary of CI Financial Corp. ("CI").

Continued

WEBULL and CIIS are registered with the Canadian Investment Regulatory Organization ("CIRO") and are members of the Canadian Investor Protection Fund ("CIPF"). Assets held in clients' accounts are protected by the CIPF within specified limits. A brochure describing the nature and limits of coverage was provided at account opening and is also available upon request.

All cash positions are covered under the Canadian Depository for Insurance Corporation up to specified limits, for eligible accounts.

Copies of our financial position as of our most recent financial year-end and a list of our Executives and Directors are available upon written request.

It is suggested that you retain this statement for income tax purposes. The securities transactions shown on this statement are disclosed to Revenue Canada, as required by law, on an annual basis.

The "Asset Location" column provides information on how securities in your accounts are held. "SEG" (segregated) indicates fully paid securities which are segregated and held for you in nominee form. "SFK" (safekeeping) indicates fully paid securities, which are segregated and held registered in your name.

Segregated Securities are securities held for your account in your name (SFK) or in bearer form (SEG) and may not be used in the conduct of our business while segregated.

Fully paid securities are segregated on the records of CIIS and cannot be used in the normal course of our business. Any free credit balances represent funds payable on demand which, although properly recorded in CIIS' books are not segregated and may be used in the conduct of our business. Cash balances in registered accounts are held in trust by the plan trustee Canadian Western Trust.

All amounts, unless otherwise noted, are reflected in the currency that is identified on the statement.

The Market Value of securities in your account is determined using sources that are considered to be reliable, however the accuracy of those sources cannot be guaranteed. When CIIS becomes aware that previous trade prices may not be representative of the Market Value, then the abbreviation of "ND" (not determinable) will be used to indicate there is no reliable price information available and, after 365 days, the value will be reflected as \$0.

Estimated value: This indicates, in the case of securities not listed on an exchange or traded infrequently, that the value given is an estimate which does not necessarily reflect the actual market value.

The Book Value reported on your statement is the total cost, including commissions and fees, of purchasing a security. A short position will result in a negative book value for that security.

The following superscript notations may be associated with Book Values in the holdings section of your statement:

i) This notation indicates some of the transactions contributing to this position do not have an associated Book Value. To better reflect changes in the value of this position, Market Value has been used to estimate part or all of the Book Value. For example, if the Book Value was not available for positions transferred to CIIS then the Market Value as of the date of the transfer was used in lieu of Book Value. For security positions without a Book Value prior to December 31, 2015, the Market Value information as of December 31, 2015 has been used to estimate the Book Value.

ii) This notation indicates the Book Value for some or all transactions contributing to this position was not determinable. To better reflect changes in value of these positions, where Book Value was unavailable, the Market Value may have been used to estimate part of the Book Value. Where the Market Value was not determinable a Book Value of "N/D" (not determinable) or \$0 was used.

The Book Value shown in this statement may not be suitable for income tax purposes, as it may not reflect all required adjustments. It is important for you to keep records of all your investment transactions and consult your income tax advisor to properly determine your gains and losses for income tax purposes.

Transactions are displayed in chronological order. Opening and month-end balances are also shown. Purchases and/or dispositions of securities resulting from transactions settled after month-end will be reflected in the following month's statement.

Please check this statement for any errors, irregularities or omissions. Within forty-five (45) days after being mailed to you if any, they should be reported within fifteen (15) days from its online posting to your account or physical delivery (where a client has subscribed for paper statements) in written format otherwise the statement will be considered correct as printed.

We reserve the right to adjust this statement for errors or omissions.
